Dear Families,

Please be aware that Mylan has voluntarily recalled 13 lots of Epipens that were distributed between December 2015 and July 2016 due to a potential defect in the activation device reported in a defective device that had previously been recalled.

They expanded their recall to include additional lots as a precautionary measure.

Please click the link below to check which lots are on the recall list; if you have one of the recalled Epipens, please read further into the link for contacting Stericycle to return yours.

Thank you,

Ellen/Kim/Sally-School Nurses
